### Caring about bringing quality to you

Medical + Optical is a privately owned company. Our aim is to provide intelligent solutions for today's Healthcare needs. We work closely with our major international suppliers to ensure our product offering is of the highest quality and meets the requirements of the end user. Our sterilization baskets are manufactured in Italy by the global company CBM and Medical + Optical are delighted to be their Australian distributors.

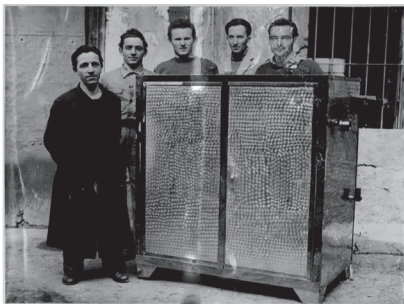

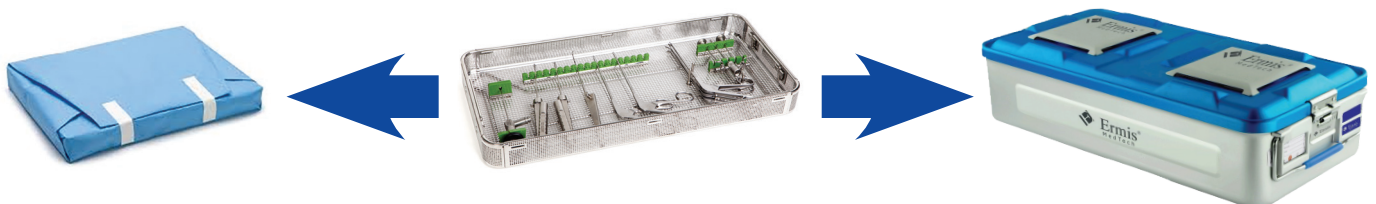

CBM was founded by Cav. Busatti in 1947, based originally in Milan and moving to its new, much larger site in Torre de' Picenardi (Cremona) in 1962. CBM conforms to all the European and Global Standards for manufacturing and is a significant member of the European Technical Committee CEN and the International Standards Committee ISO. This involvement ensures that CBM remains one of the leading manufacturers of sterilization baskets in the world. The CBM range of sterilization baskets use the highest standard of raw materials, such as, AISI-304 Medical Garde Stainless Steel and the most advanced machines available. All CBM products comply with the Australian Standard™ AS 5369:2023, and its Normative References for compliance in infection control, instrument transport and protection.

# Standard Sterilization Baskets

These stainless steel baskets are the most popular sizes used by hospitals. They can be wrapped or placed in a sterilization container, the choice is yours.

They have smooth surfaces and rounded corners to minimise the risk of tears and each perforated sheet basket has the option to take 2 different styles of lids, depending on your preference.

All of these baskets can accommodate a range of inserts and accessories that can help both organise and protect your surgical instruments.

## Plastic Tray Replacement Baskets

These 3 baskets sizes are the exact dimensions of the most commonly used plastic trays. These sizes facilitate a smooth transition from a plastic basket system to a stainless steel basket system. Unlike the plastic trays, these metal baskets can be used throughout the washing and sterilization processes without the need to double handle.  However, these sizes are not suitable for use with a Rigid Sterilization Container as they are not International DIN Sizes

| Product Code | Product Description | Dimensions<br>L x W x H (mm) |

# MINI Perforated Sterilization Baskets

MINI Baskets are suitable for the protection of delicate/sharp instruments, as they are constructed from 2 x 2mm Stainless Steel Mesh on all 4 sides with the base and removable lid being constructed from 4 x 4mm Stainless Steel Mesh. MINI Baskets are compatible with many inserts from our range of accessories and can be used inside larger baskets to protect delicate instruments. They are also designed to help protect the end users and other staff during all stages of reprocessing and storage.

# MICRO Perforated Sterilization Baskets

These MICRO Baskets are ideal for delicate and sharp instruments, as they have only 2 x 2 mm perforations on all surface areas. They can be utilised with the silicone matting to not only protect the delicate instruments inside but also to protect the users during reprocessing, transportation and storage. Many of these Micro Baskets are used inside another larger basket to keep the delicate or sharp instruments away from the other instruments.

Please note inserts cannot be fitted to micro perforated sheet baskets due to perforation size.

# Rigid Scope Perforated Sterilization Baskets

Scopes are an expensive asset and can often be damaged beyond repair if not adequately protected during safe removal at point of use, reprocessing, storage & transportation.  By using these Rigid Scope Baskets and an appropriate selection of accessories, you can protect these valuable assets and help to minimise repair and replacement costs.

These Rigid Scope Baskets are suitable for use with both Steam Sterilization and Hydrogen Peroxide (high grade disinfection) processes.

Soft silicone with multiple perforations that allows effective cleaning and steam penetration for sterilization.

Designed to protect your instruments inside a sterilization basket throughout both the wash cycle and the sterilization cycle.

They are available in many different sizes to meet your needs but can easily be cut to the exact size to meet your requirements.
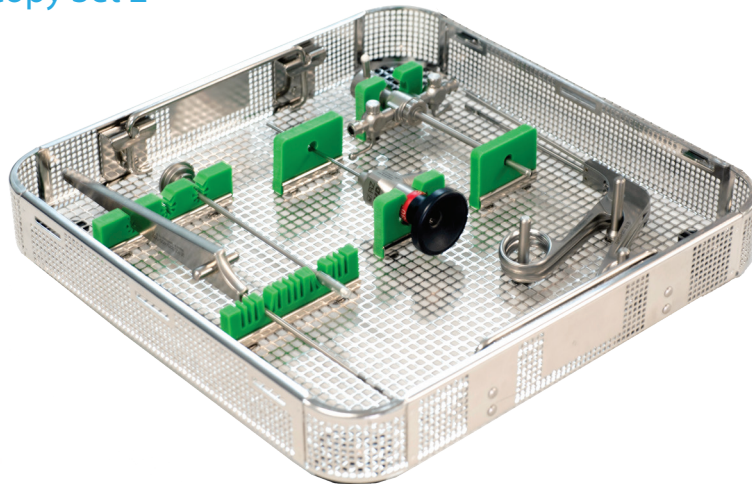

# Examples of Instrument Set Layouts

## Small Joint Arthroscopy Set 1

| Product Code | Product Description | Quantity |
